Personal Helicopter

**FIRST VIEW**

# MK 09

Personal Helicopter

The MK09 is the answer to cities congested congested by road traffic, to the need to be present in several places in a short period of time, to the desire to be in Capri for lunch.

It carries you and a companion rapidly and in comfort from where you are to where you want to go.

Enjoy flying in the superbly appointed interior of the MK09.

The MK09 is compact, facilitating take-off and landing in small places.

# MK 09

## Personal Helicopter

- Co-axial rotors, single engine, 135hp
- Dual tandem seats.
- Small rotor diameter, while providing maximum lift and stability.
- The MK09 is a brilliant technical solution between an ultralight and a larger helicopter.
- The MK09 has excellent visibility and ample space, while maximizing aerodynamics.
- The MK09's clean lines and push propeller enable a cruising speed of over 200km/h for nearly four hours.
- The MK09 combines push propeller with turbine effect to enable long hovering, even in hot weather.

Personal Helicopter

An unmanned version of the MK09 is planned for Summer 2011.  
The MK09 UAS will have a different engine, and increased payload and endurance.
